PATH TO CODE

With over a decade of success in commercial lighting sales, I found myself curious about what happens behind the scenes of the technology I use daily. This curiosity sparked a deep dive into software development, which quickly grew into a passion. After years of self-guided learning and a growing fascination with technology, I'm ready to turn this passion into my career. My experience as a dedicated learner and a seasoned sales professional gives me a unique ability to create software with the user's needs front and center.

FAVORITE SOFTWARE PROJECTS

- Construction Document Splitter
- DJ Helper
